

## **Workplace Technology Survey (WTS)**

The **Workplace Technology Survey (WTS)** is a newly released tool to add to the Workforce Readiness System. This tool takes very little time to complete and measures an individual's perception of the do's and don'ts on the use of technology in the workplace.

### **The Workplace Technology Survey (WTS):**

- is text based
- allows the individual to self-rank themselves on a number of statements pertaining to the use of technology at work
- can be completed online or offline via paper response form through the same career portal as the Workforce Readiness modules
- provides feedback and rationales for development

Why should your Participants complete the **Workplace Technology Survey (WTS)**? Simply because the use of technology, such as cell phones and social media, is another obstacle keeping them from getting jobs.
